ENvironmental Engineering

Exercise 5

Report & Presentation

David Zumr

Report

-Prepare one brief report per group

-Contents:

- Title page (authors, month/year)
- Introduction of the project (what and why will be constructed, key stakeholders)
- Key environmental issues (with brief description of the significance)
- Other environmental problems (only a list, max. one sentence to each)
- Considered alternatives (with description of your alternative solution)
- Quantified impacts on the environment and comparison of the alternatives (with brief discussion)
- Summary/conclusions
- Proposed division of percents/points among the team members
- References

Report

Suggested table of contents:

- Introduction
- Environmental impacts
 - Key environmental impacts
 - Other Environmental impacts
- Alternative solution
- Comparison of the alternatives
- Conclusions
- References

Do not forget to reference all sources (incl. pictures, maps)!

Report

Form of the report

- app. 15 pages (10 to 30 p. limit, incl. figs.)
 - All necessary information needs to be included (empty phrases do not count)
- **Hardcopy !!! Bind the papers, please (stapled is ok).**
- **B&W print is enough**
- **Must be submitted BEFORE the exam**
 - 1 second before the exam is still ok
- **The report will be evaluated, the points will be added to the exam**
 - If you want feedback and time for corrections, send a pdf by e-mail in advance

Presentation

- ppt, pdf, prezi...
- App 12 min (you will be stopped after 15 min!)
- Include interesting stuff only! Do not cover everything
- Anybody can present (one person or whole group)
- 5 min discussion after presentation, anybody can be asked a question
- **ALL TEAM MEMBERS MUST BE PRESENT !**
 - No show without prior excuse = zero points from the seminar
