

3rd Workshop on soil physics and landscape hydrology

Desná (Jizera Mountains) - 3.10. to 4.11.2022

Topic and scope

Presentation of the actual scientific outcomes presented mostly by the phd students working on various research projects related to soil physics and hydrology. Covered topics will be: transport of water and solutes through soils, catchment hydrology, rainfall-runoff processes, soil degradation, remote sensing in landscape hydrology, geographic information systems and numerical modelling.

The workshop aims on students of doctoral study program Civil Engineering, branches Water Engineering and Water Management and Environmental Engineering, also a limited number of master students involved in the research projects may attend. The workshop will be held in English as also foreign phd students are anticipated.

Registration

For registration fill google sheet. The deadline for registration is 15th of October.

Location

2nd Workshop on soil physics and landscape hydrology will be held in Desná in Jizera Mountains in Scout Mountain Base Desná (Map).

Organization

David Zumr Ing. Ph.D. (david.zumr@fsv.cvut.cz), Martin Neumann Ing., Jakub Jeřábek Ing.
